FIRST PRODUCTION: 2001

The Super Tool® 200 takes the classic Super Tool and makes it better than ever. With rounded handles for comfort and easy to unlock blades, the Super Tool 200 combines upgrades found in the Pulse with the heavy-duty strength and size of the Super Tool. The serrated knife blade now

features a sheepsfoot shape. All ten of the Super Tool 200's locking blades are easily unlocked by rotating the lock release on the outside of the handle. It's still the biggest, strongest tool we make but now it's even better at tackling the toughest jobs. The ideal multi-tool for the real pro.

Packaging

The Super Tool 200 is sold in box or clamshell packaging.

**Sheaths**

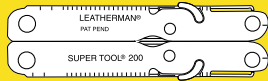

Choice of rugged leather or durable nylon belt sheath is included.

**Point of Purchase**

Various point-of-sale materials are available to help display Leatherman tools and communicate their benefits.

**Adapter**

The Super Tool 200 is compatible with the Tool Adapter™ hex bit driver. The Super Tool 200 is also sold with the Tool Adapter in a combo that includes a bit holder and a leather all-in-one sheath.

COMPACT 4.5 INCH SIZE

LOCKING BLADES RELEASE QUICKLY

BUILT FOR HEAVY-DUTY USE

THE DIFFERENCE

All ten blades lock and unlock quickly by rotating the lock release on the outside of the handles. Combines all of the features of the classic Super Tool with the comfortable handles and locking mechanism of the Pulse. it's the biggest, strongest tool we make.

WARRANTY SERVICE

We proudly back our products with a 25-year guarantee (limited warranty) If you or your customer ever have a problem with a genuine Leatherman tool, we will make it right with prompt warranty service.

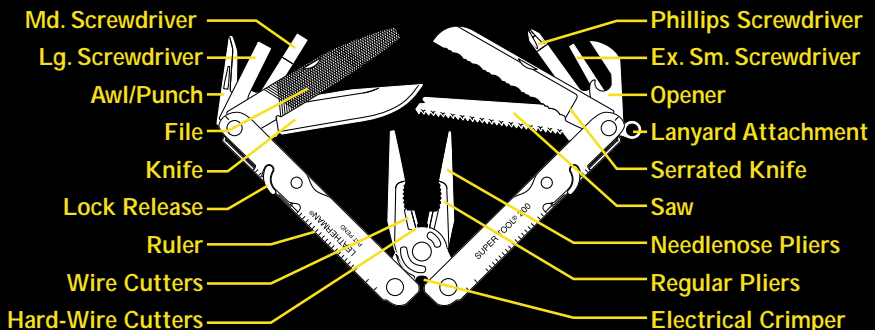

STEEL CHARACTERISTICS

Leatherman tools are made from 100% stainless steel to provide years of dependable service. Each 400-series stainless implement is heat treated to optimal hardness for its function. For example, our knives and files are typically tempered to Rockwell C 57 to achieve excellent edge retention. Our plier jaws and most screwdrivers have a Rockwell C hardness of 49-53 for better durability.

QUALITY STANDARDS

How is Leatherman quality better than the rest? Look at the sharp corners on our screwdrivers, built to ANSI specifications for strength and dimensions (which we verify with a laser micrometer). We regularly torture test our plier jaws; they are finished and riveted so precisely you can cut paper with the wire cutters. Even non-functional cosmetic flaws no bigger than a speck of pepper are not acceptable in any of the numerous inspections each tool must pass.

WHY BUY A LEATHERMAN?

In 1975, Tim Leatherman (totally traveling through Europe with a tight budget and a cranky car. His trusty scout knife just couldn't handle the job. Tim wished he had a compact set of tools including full-sized pliers. Back home, he put his engineering skills to work and after seven years (picky, picky, picky), the original Leatherman tool was perfected. Why should you buy a Leatherman? Tim's standards for quality, durability, precision and attention to detail are what make Leatherman tools like no others. Ever since Tim invented the category we've focused on just one thing - manufacturing the world's highest quality multi-purpose tools. We're not only the original, we're the world's leader. Put it to the test for yourself. You'll be pleased you bought a Leatherman.
